## TABLE OF CONTENTS

<b>Foreword</b>	xv
<b>Preface</b>	xvii

### **Introduction**

Chapter 1 _____	3
-----------------	---

#### **Objectives, Definitions, and General Approach**

Sexual identity. Sexual relationships. Normalization. Toxication & detoxication. Medicalization. The scientific discourse. Biological, psychological & sociocultural sexual identity. Heterosexual identity. The structure of sexual relationships. Individualist vs. Collectivist approaches. Psychiatrization & the "implantation of perversions." Biological determinism & biological potentiality.

Chapter 2 _____	21
-----------------	----

#### **Three Cosmological Views of Sexual Relationships**

Polytheistic, monotheistic & scientific cosmologies. Greek homosexuality. Pederasty & prostitution. The sexuality of the gods in polytheistic traditions. The monotheistic view of sexual relationships. The scientific philosophy of Descartes, Newton, Locke & others. Scientism.

Chapter 3 _____	45
-----------------	----

#### **From Sodomy to Degeneracy**

Changing concepts of sodomy in medieval & modern periods. Sodomy in the Bible. Medieval injunctions. Association with heresy, treason & social disorder. Pederasty. Somaticism vs. Psychologism. Sodomy and degenerative illness. Degeneracy as reversal of evolution.

### **Part One: The Biological Sexual Identity**

Chapter 4 _____	61
-----------------	----

#### **Creation of the Idea of Sexual Identity**

The discourse on masturbation & its link to sexual identity. Karl Heinrich Ulrichs & Károly Mária Kertbeny (Karl-Maria Kertbeny). 18th-century medical considerations of masturbation. Onanism. Samuel-Auguste Tissot. Nineteenth-

century thought. Claude Francois Lallemand. Benjamin Rush. Sylvester Graham. Ulrichs & the first explicit theory of sexual identity. Benkert/Kertbeny & Prussian law.

Chapter 5 \_\_\_\_\_ 77

**Sexual Identity and Degeneracy Theory**

Homosexual conduct as a clinical condition. Paederastia. Tardieu: the medical detection of paederasts. Carl Westphal: "contrary sexual feeling." Julien Chevalier: "inversion of the sexual instinct." Richard von Krafft-Ebing: *Psychopathia Sexualis*. Antipathetic sexual instinct & the taxonomies of perversion. Homosexual conduct as confusion of "natural" sex differences.

Chapter 6 \_\_\_\_\_ 97

**Environmental and Evolutionary Theory**

Degeneracy as "imperfect" femininity or masculinity. Benjamin Tarnowsky: "innate perversion of the sexual instinct." Congenital vs. acquired pederasty. Alfred Binet's study of fetishism. Albert von Schrenck-Notzing & the expansion of theories of "environmental causation." Morton Prince's challenge to degeneracy theory. Albert Moll, Uranists, "psychosexual hermaphrodites" & a reformulation of etiological theories of perversion. Libido sexualis. Max Dessoir: stage theory of sexual instinct.

Chapter 7 \_\_\_\_\_ 119

**Detoxication of the Homosexual Identity: Biological Theories**

Havelock Ellis & *Sexual Inversion*. The congenital theory. Original bisexuality. Male & female "inverts." Magnus Hirschfeld: *Die Homosexualität*. Pedophiles, ephrophiles, androphiles, gerontophiles, graophiles, pathenophiles, gynecophiles & corophiles. Pseudohomosexuality. Perversion vs. inversion.

**Part Two: The Psychological Sexual Identity**

Chapter 8 \_\_\_\_\_ 143

**The Creation of the Heterosexual Identity**

Sigmund Freud & the "unified theory" of sexual development. The unconscious, preconscious & conscious. The libido. Polymorphous perversity. Oral, anal & genital phases. Sexual objects & sexual aim. Regression & fixation. Kontrarsexuale, Invertierte & die Inversion. The oedipus & castration complexes. The heterosexual imperative.

### From Perversion to Neurosis

Sándor Ferenczi: bisexuality vs. ambisexuality. Helene Deutsch: the preoedipal drama. Karen Homey. primary & secondary penis envy. Hans Sachs. Melanie Klein. The "good penis." Flight from femininity. Wilhelm Stekel: congenital bisexuality. Male homosexuality as disguised sadism toward women. Roy Schafer. Clara Thompson. Frank Caprio: homosexuality as neurotic self love. Sandor Rado: the nonexistence of bisexuality. Genital psychopathology. Harry Stack Sullivan: homosexuality rooted in parental relationships. Lionel Ovesey: homosexuality as retreat from heterosexuality. Preoedipal vs. oedipal homosexuality. Abram Kardiner. Irving Bieber & the fear of heterosexuality. The "close-binding-intimate mother." Robert Stoller. Differentiating homosexual from transsexual development. Reinforcement of heterosexuality as normative sexual identity. Charles Socarides: learned sexual preference. The achievement of normal heterosexual genital primacy. Oedipal & preoedipal homosexuality. Female homosexuality as flight from men.

### Detoxication of the Homosexual Identity: Psychological Theories

Responses to pathologizing of homosexual identity. Thomas Szasz as first "detoxicator." Psychiatry as handmaiden of law & morality. The problem of forcing homosexuals into psychiatric treatment. *The Manufacture of Madness*. Criticisms of Karl Menninger & Irving Bieber. Judd Marmor: prevention of homosexual identity. Marmor's reassessment in *Homosexual Behavior*. Therapeutic efforts to prevent effeminacy & homosexuality in boys. Marcel Saghir & Eli Robins: study of nonclinical homosexuals. Pathologies born in poor parental relationships. Differences between male & female homosexuals. "Incidental" & "situational" homosexual behavior. Marmor & "uncontained" sexuality.

### Pathologizers versus Detoxicators: The Psychiatric Debate

Ideological struggles within the American Psychiatric Association. Revision of the DSM, 1952-1973. Detoxication of homosexual identity. The response of "gay liberationists." Richard Green, Martin Hoffman, Judd Marmor, Lawrence Hatterer, Arno Karlen, Charles Socarides, Richard Stoller, Irving Bieber, Robert Spitzer. Ego-dystonic homosexuality & the DSM-III. The impact of Freud. The psychiatric debate as a reprise of the three cosmological views of sexual relationships.

## Part Three: The Sociocultural Sexual Identity

Chapter 12 \_\_\_\_\_ 265

### **Cultural Identity: The Anthropological Approach**

Sexual identity as a product of biological & cultural forces. Critique of psychological sexual identities. Iwan Bloch: heterosexual relationships as the bedrock of civilization. Adverse effects of masturbation on the *vita sexualis*. Edward Westermarck & the anthropological view. Bronislaw Malinowski: the sexual customs of the Trobriands. Margaret Mead, sex differences & the role of mothers. Rigid enforcement of masculine & feminine norms as a cause of homosexuality. Ford & Beach. Exclusive heterosexuality or homosexuality as diminution of sexual capacity. Shamans & berdaches. Anthropology's contribution to the normalization of sexual relationships. Sexual relationships in the West limited more by cultural norms than by human biology or psychology. The scientific cosmological view of sexual relationships.

Chapter 13 \_\_\_\_\_ 289

### **Behavioral Identity: The Survey Approach**

The Kinsey reports. Refutation of psychoanalytic/Freudian theory. Similarities to Freudian approach. Biological determinism. Dissimilarities in male/female "sexual capacity" attributed to "cerebral differences." Sexual identity as a behavioral phenomenon. Homosexuality & neurosis. Impact of sociocultural hostility. Broadening the notion of sexual "normality." Involvement of the Kinsey group in debates over nature/origin of homosexuality. Wainwright Churchill & "homosexuality as behavior." Human capacity for "sexual learning." Rejection of psychoanalytic theory. Sex-positive & sex-negative cultures. The "homosexual way of life" as symptom of sex-negative society. The fallacy of romance. Clarence Tripp: *The Homosexual Matrix* Femininity vs. effeminacy. The origin of heterosexuality & the question of male/female traits. Sexual value systems. Homosexual & heterosexual complementation & resistance. Futility of change therapy. Churchill & Tripp compared.

Chapter 14 \_\_\_\_\_ 325

### **Subcultural Identity: The Ethnographic Approach**

The "homosexual subculture." Donald Webster Cory: rejection of innate homosexual "nature." Ethnography of gay locales. Maurice Leznoff & William Westley. Secret vs. overt homosexuals. Evelyn Hooker & the total homosexual way of life. Adjustment of homosexual vs. Heterosexual males. Psychoanalytic concepts in Hooker's approach. Gay bars as "markets." Rejection of idea of dichotomized sex roles in homosexual male relationships. Hooker's contribution to detoxication. Albert Reiss: male prostitution & "queers and peers."

Sociocultural vs. Psychological identity. Richard Hauser: homosexual "types" in England. Minority status & stigmatization. Michael Schofield's homosexual types. Social hostility toward homosexuals & promiscuity. Paul Gebhard David Sonenschein: taxonomy of homosexual relationships. Martin Hoffman: the sexual marketplace & sexual fetishism. Laud Humphreys: *Tearoom Trade*. Sociocultural sexual identity. Variation in ethnologists' portrayals of homosexual relationships reveals assumptions about sexual identity. The embodiment of cosmological concepts in the ethnographic approach.

Chapter 15 \_\_\_\_\_ 359

**The Socially Constructed Identity: Symbolic Interactionism**

John Kitsuse: social reactions to deviant behavior. Mary McIntosh: homosexual identity as social role. John Gagnon & William Simon: distortion of the meaning of sex via biological determinism. Rejection of psychoanalysis. Sexual scripts & "life cycles." Social adjustment of lesbians. Barry Dank: coming out in the homosexual subculture. Shift from heterosexual identity. Kenneth Plummer: symbolic interactionism & meanings attached to sexual activity. Sexuality situationally defined. Western homosexual identity as creation of social intolerance. Stages in the homosexual "career." Erich Goode: the homosexual role. Frederick Whitam: objections to role & deviance theory. Symbolic interactionists' rejection of psychological sexual identity. Minor role assigned to biology. Concepts of sexuality devoid of desire, attraction, pleasure.

Chapter 16 \_\_\_\_\_ 395

**The Demise of Labeling Theory: The Post-Kinsey Sociologists**

Labeling theory. Colin Williams & Martin Weinberg. Repercussions of homosexual label on adaptation of male homosexuals. Social intolerance & negative adaptations. Dangers of "the heterosexual world." Subcultural benefits. Contribution to normalization of sexual relationships. Alan Bell: "homosexualities" & social adjustment. Bell & Martin Weinberg's taxonomy of homosexual partnerships: Close-Coupled, Open-Coupled, Functionals, Dysfunctionals, Asexuals. Bell, Weinberg & Susan Hammersmith's study of the etiology of sexual identity. Rejection of psychoanalytic & sociological theories. Gender nonconformity & sexual identity. Return to biological etiologies. Summary of studies of homosexuality by post-Kinsey sociologists. Sociocultural homosexual identity as moral discourse on permissible structures of sexual relationships.

### **The Collective Homosexual Identity I: Minority, Community, and Lifestyle**

The sociocultural homosexual identity as "minority," "community" & "lifestyle." Laud Humphreys: parallels with racial, ethnic & other minorities. Del Martin & Phyllis Lyon: lesbian identity as minority status. The collective lesbian identity & lifestyle. Applying standards for healthy heterosexual relationships to lesbian relationships. Comparisons of Lyon/Martin approach to work of Donald Webster Cory. Joseph Harry & William Devall: ethnography of gay subculture. Theories of collective identity contribute to claims of homosexual superiority in detoxication efforts. Barry Adam: the gay minority. Gay identity as social construction. Deborah Wolf: lesbian community & lesbian-feminism. The lesbian pair & lesbian mothers. Virginia Brooks: lesbian minority status. Coping with stress. The homosexual "world" transformed into gay & lesbian community. Homosexual identity politicized as gay & lesbian minority membership. Paradoxes in lesbian-feminist ideology.

### **The Collective Homosexual Identity II: Homophobia and the Gay and Lesbian Identity**

George Weinberg: homophobia as social prejudice. Criticisms of psychoanalysis & behavioral therapy. The "healthy homosexual." Quantitative techniques for measuring homophobia. A. P. Macdonald: organism deficiency vs. social deficiency. James Millham: Homosexuality Attitude Scale. Eugene Levitt & Albert Klassen: Homosexophobia Scale. James Millham & Christopher San Miguel: studies of aggression toward homosexuals. Stephen Morin & Ellen Garfinkle: latent homosexuality as cause of homophobia. Michael Storms: homophobia as antipathy toward sexual identity or social-sex-role "departure." Rodney Karr: labels & social distance. Heterosexual bias in psychological research. Reverse discourse: homophobes vs. homophiles. Homophobia as relabeling of social intolerance. Joel Hencken & William O'Dowd: three stages of gay identity formation. Carmen de Monteflores & Stephen Schultz: coming out & integration. Vivienne Cass: theoretical model of homosexual identity formation. Eli Coleman: five-stage model. Comparison of "identity formation" approaches & their contribution to normalization of homosexual relationships. Minority status, "community" & resistance to heterosexual oppression.

## Part Four: The Recrudescence of the Biological Sexual Identity

Chapter 19

493

### The Hormonal and Genetic Sexual Identity: Psychomedical and Sociobiological Approaches

Psychomedical & sociobiological approaches. John Money: gender identity, gender role, gender dimorphism & biological imperatives. Facultative vs. obligative homosexuality. Homosexuality as "incongruity" of gender identity. Richard Green: studies of "feminine" boys. Children of homosexual or transsexual parents. Homosexual men/women as "unfinished" or "incomplete" members of their biological sex. Shrinking of the limits of permissible sexual relationships. The search for links between homosexuality & hormone abnormalities. Meyer-Bahlburg. Reviews of hormone studies. "Intersexuals" and "hermaphrodites." Gender-dimorphic behavior in children. Gunter Dörner: prenatal hormonal abnormalities. Genetic origins of homosexuality. Lang & Henry: family studies. Pillard: "familial factor." Kallmann: twin studies. Psychomedical research on sexual identity. Homosexual men & women as contradictions of nature's design. Sociobiology and E. O. Wilson. Natural selection, altruism & kin selection. Michael Ruse. James Weinrich: homosexuals as nonreproductive altruists. Biological sexual identity clothed in trappings of psychological sexual identity. Importance of male-female design. Futuyma & Risch: criticisms of sociobiological approach. Reflections of 19th-century views & earlier psychological & sociocultural formulations in recrudescence of biological sexual identity.

Chapter 20

543

### Identity As Physiology

Masters & Johnson: physiological approach to sexual identity. The phases of sexual activity. Sexual capacities of males & females. Sexual dysfunction & "psychosocial factors." Sexual surrogates. *Homosexuality in Perspective*. Comparisons of physiological & psychosexual behavior in heterosexual vs. Homosexual relationships. Fascination & curiosity regarding "ambisexuals." Sexual inventiveness of homosexuals as response to biologically restricted repertory. "Dissatisfied" homosexuals and conversion/reversion therapy. Tacit belief in biological sexual identity. Contributions to detoxication. Monotheistic constriction of sexual activity within a single relationship. Science & scientism.

Chapter 21

577

### Conclusion: From Sexual Identity to Sexual Relationships— A Long Look Back and a Short Look Ahead
